

## HEALTH AND SAFETY POLICY: RESPONSIBLE USE OF DISTRACTORS AT WORK

**COMSA Corporación** prohibits the use of distracting devices at work, such as radios, music devices, headphones, mobile phones...

The use of radios, music devices and headphones is strictly forbidden at work due to the ambient noise and the isolation they cause for the worker.

Make a **#mobileresponsibleuse**. Mobile phones are only permitted when used as working tools to communicate at work, taking the following measures:

1. When driving vehicles and/or machinery, the use of mobile phones is strictly forbidden. If you have to use a mobile phone, you must stop driving and handling loads.
2. In tasks with special risks, the use of mobile phones is strictly forbidden. If you have to use your mobile phone, stop the activity and find a safe place to answer or make the call.
3. When moving around the work, you must pay attention to the route and the environment around you. Avoid accidents caused by looking at your mobile phone. If it rings, you can answer it, but always in a safe area; if not, return the call later.
